

Due to the desire to broaden the resident's inpatient experience at David Grant Medical Center and to increase availability for ward rotations in the UC Davis Medical System the administration has decided to addend the inpatient rotation in the following manner:

The 4 team structure will remain, but the resident will be the same for the B and D team. There will be a resident that is assigned to an outpatient elective month to cover the every other q2 call for the resident on this combined team designated as the Rent-a-Resident

- B/D team will have 1 resident and 2 interns.
- Night float hours 7:30 pm – 8 am, home by 9:30 am Sun - Thurs
- B/D interns will alternate short call (2 admits or until 12:00 pm) and long call q2
- Rent-a-Resident hours 8 am – 7:30 pm on Sun-Thurs, 8 am – 8 am on Fri, Sat
- There will only be 2 interns on call in the ICU; however, call remains q3. So, every 3rd night the floor intern will cover/admit to the ICU. Check-out must happen between the ICU resident and the floor resident/intern for these nights. It will be highly encouraged for either the resident or intern to round with the ICU team on those days as well. All those patients admitted to the ICU will then be transitioned to the ICU team in the morning.
- Backup Sunday-Thurs will be provided by the ward team resident. On Fri/Sat, the jeopardy resident will serve as back-up. So the order is 1. ward resident 2. jeopardy resident 3. staff. Especially on the nights when there is only 1 intern on call, the back-up MUST be available on pager.
- There will be one staff for all four teams. This staff will attend for 2 weeks straight while being completely relieved of regular clinical duties.
